 - Refresh Leads

Overview

'edh refresh leads' is the command to load lead activity data from Persuade into the EDH. It can be called using the following syntax:

```
edh refresh leads [command] [options]
```

Parameters

1. *Customer* = '-c' integer id, client id within EDH; **required**
2. *Input File* = '-i' file path to csv file containing information on donor entries; required for Donor command
3. *Environment* = '-e' (local | staging | prod); **required**
4. *Profile* = '-p' (small | medium | large); Defines the amount of capacity that will be used to execute this job; **required**
5. *Slack Notification* = '-S'; update slack channel #edh-job-stats with the job messages

Examples

Refresh Leads

```
edh refresh leads -e prod -p large -c baptistkentucky -i  
s3a://predict-reporting/baptistkentucky_leads.csv -S
```
